Excerpt from City of Penticton Building Bylaw 2018-01 – Section 20

20.1 Without limiting Section 6.3 of this bylaw, a person must not construct, or structurally repair, a pool without making application and receiving a valid building permit.

Application Requirements

20.2 An application for a building permit with respect to a pool permit must:

- (a) be made in the prescribed form and signed by the owner, or a signing officer if the owner is a corporation;
- (b) pay applicable application fee as prescribed in the City's Fees and Charges Bylaw;
- (c) provide a site plan showing the location and distances of the proposed pool and any accessory buildings in relation to existing buildings on the property;
- (d) construction details for the pool and the proposed method of enclosure of the pool area; and
- (e) approval of design from the Local Health Authority having jurisdiction, if the pool is accessible for public use.

Professional Design

20.3 In accordance with Section 11.3 of this Bylaw, professional design and field reviews may be required, subject to the complexity of the design and the condition of soils where the pool is to be located.

Fencing

20.4 A swimming pool, including a spa or hot tub must be enclosed within a fence constructed without footholds or grips that children may use to climb into the enclosed area, having a minimum height of 1.22m and no openings greater than 100mm at their greatest dimension. Where the access to the swimming pool is from a dwelling located on the same property as the swimming pool, the access may be directly from the dwelling.

20.5 The fence or equivalent barrier referred to in Section 16.1 shall be of chain link type material, solid material with a flat vertical surface, or vertically oriented material.

20.6 A swimming pool fence or equivalent temporary barrier shall be in place, inspected and approved prior to placing the water in a pool.

Pool Gate

20.7 Access through a fence enclosing a swimming pool, spa or hot tub must be only through a self-closing and self-latching gate designed

and constructed or installed so as to cause the gate to return to a closed position when not in use and secured by a latch located on the swimming pool, spa or hot tub side of the gate.

20.8 All openings or gates in the fence or barrier shall be locked closed when not in use.

Spa or Hot Tub Lid

20.9 In lieu of a fence, a spa or hot tub may be covered with a locking cover, which would prevent unauthorized access to the water.

Above Ground Pools

20.10 A swimming pool which is located above ground and has vertical sides of at least 1.2m may be protected from access by fencing the access ladder to limit access, with a child resistant self-closing and self-latching gate through the fence.

Maintenance

20.11 A person may not use or occupy a swimming pool, including a spa or hot tub unless the owner or occupier of property on or in which a pool, spa or hot tub is located maintains every fence or cover required under Sections 20.4 to 20.10 in good order, and without limitation maintains and repairs in good order at all times all sagging gates, loose parts, torn mesh, missing materials, worn latches, locks or broken or binding members.

Leaks or Other Failures

20.12 A person may not obtain a valid and subsisting building permit for or use or occupy a pool without first delivering to the building official at the time of the building permit application an opinion of a registered professional that the design of the pool will not cause or result in leaks or other failures of the pool.

Drainage

20.13 Drainage from pools must be contained and disposed of on the same property as the pool is located and discharged to ground where practical to do so.

Public Pools

20.14 Pools intended for public use shall not be occupied until an Operating Permit for the pool has been issued by the Local Health Authority.
