Backflow Prevention Testers

- A plumbing permit is required for all new installs.
- Backflow devices must be tested after installation and yearly thereafter.
- Test reports must be submitted to BSI Online within 7 days of testing (https://www.bsionlinetracking.ca/)
  - Contact: Lynelle Arsenault - larsenault @bsionline.ca or 604-492-0163

Please Note: This is for your reference and in no way does the City of Penticton endorse one tester over another. The Cross Connection Control (CCC) testers listed are certified and registered with the BC Water Works Association (BCWWA). All BCWWA Certified and registered testers can test CCC/Backflow devices within the City of Penticton. All test reports completed by the CCC Testers require the mailing address for where annual test reminder letters will be sent and the physical address of where the CCC/Backflow device is located. All CCC/Backflow device test reports in the City of Penticton are required to be filed with BSI online.

Need More Information? Please contact the Cross Connection Control Coordinator at 250-490-2416 or see https://www.penticton.ca/water/ccc
