Notes:

#1. Any applicable Federal or Provincial taxes are in addition to the above charges. Penalty interest at the rate of two percent (2%) per bill for current charge amounts remaining unpaid after the passage of the due date denoted on the bill will be applied.

#2. Basic charges will be applicable to accounts that are disconnected from electric for seasonal or temporary purposes when the electric is being turned off at the account holders request but the account holder(s) is not altering.

#3. City Electrical Infrastructure is defined as: Any items related to the City of Penticton Electrical Utility distribution system including but not limited to primary duct and secondary duct, street lighting, power cables, transformers and associated appurtenances.

#4. All customers are eligible to access the "Electrical Service Payment Plan" for the installation of City Electrical Infrastructure and/or customer owned Micro-DR equipment that supplies power to their properties. The details of this program are summarized as follows:

- Payment Plan range: A customer can put a minimum amount of $2,000 up to a maximum amount of $50,000 on a Payment Plan;
- Payment Plan terms: 5 year payback in equal monthly amounts on the Electric Utility Bill plus interest calculated at the Prime Interest Rate +0.5%; and
- The customer has the ability to end the Payment Plan at any time by repaying the balance owing in full at any time without penalty.

Eligibility requirements:

- Must be for a new or an upgrade to an Electrical Service;
- Must be a City of Penticton Electric Utility customer;
- Must have a credit score of: 650 or greater for an individual, or less than 25 for a business;
- Must have a maximum of 19 City of Penticton Utility Credit Points;
- The customer must own both the land and building where the service is required; and
- If Micro-DR, receipts must be submitted from the contractor performing the work; and
- Protection: Any defaults on the Payment Plan will be subject to the normal City of Penticton utility collection procedures, including service disconnect and ultimately transfer of outstanding amount to taxes. Any outstanding payment plan amounts must be paid in full upon sale of the property.

Sanitary Sewer Fixture Charges

Such charges to be effective immediately upon the expiration of 180 days (60 days in the case of a renovated building) from the date of validation of the building permit, provided however, that this amount may be pro-rated from the effective date to December 31 of the year in which the building is built or renovated.

An extension to the 180 day period will be considered providing the builder applies **in writing** to Building & Licence Division prior to the expiration of the 180 day period. Should a request come from a builder **after** the expiration of the 180 day period, an extension may still be granted upon payment of an administration fee:

Extensions are only to be granted in multiples of 30 days, i.e. 30, 60, 90 days.

Appendix 25

SEWER	2025	2026

Residential Uses includes: All single family, duplex, multi-family and mobile home parks

Non Residential Customers may apply after paying the prescribed fee to the City for a reduction in the % of water use to calculate the sanitary sewer usage fee to account for business practices that create a large discrepancy between water use and sewage generation.

The following business practices will be eligible for consideration for a reduction:

i. Water used to produce a product for sale that is consumed or used off the site. Examples include: Concrete production, off sales beer and wine, take out coffee and soft drinks.

ii. Water used to irrigate plants that are sold. Examples include: Garden Centers.

iii. Water used in a cooling process that does not enter the sanitary sewer.

iv. Water used by contractors in water trucks for dust control.

The requested reduction in water use must be substantiated either through:

i. The installation and reading of a water meter that will monitor the water used in the process for which the reduction is being sought.

ii. Financial records or audit documents prepared by an accountant or a report prepared by a professional engineer that calculates the volume of water that should be considered for reduction.

The cost of producing the substantiation is to be borne by the party requesting the reduction.

No reduction will be granted for volumes of water less than 5%.

A person found to have submitted false information to support their reduction request will be required to pay the Fee for falsification of information on a Request for Reduction
