**Committee of the Whole**  
to be held at  
City of Penticton, Council Chambers  
171 Main Street, Penticton, B.C.

**Tuesday, January 22, 2019**  
**Recessed from the Regular Council Meeting at 1:00 p.m.**

1. **Call Committee of the Whole to Order**
2. **Adoption of Agenda**
3. **Delegations and Community Recognition**
  - 3.1 Mental Wellness Centre 1  
Obi Oniah, Jim Cleghorn, Sharon Evans
  - 3.2 Protection and Management of the Penticton Oxbows 2-3  
Rick McKelvey
  - 3.3 RCMP Year End Report 4-16  
Supt. Ted DeJager
4. **Adjourn to Regular Meeting of Council**

penticton.ca

**Request to Appear as a Delegation**

Preferred Council Meeting Date: Dec<sup>Jan</sup> 23 12

Second choice(s): Jan 9th

Subject matter: Mental Wellness Centre

Name of person(s) making presentation:

Obi Oniah, Jim Cleghorn, Sharon Evans

Address: 118-246  
Martin Street

Phone:  
Email:

Please provide details of your presentation or request of Council here: (or provide a detailed attachment)

To discuss the mental wellness Centre
- Mental Health Awareness
- Family support for people living with someone with an illness
- Peer support
-

**Please note:**

- This form and submissions will become part of the public record.
- The Mayor has the authority to determine if the subject matter warrants the delegation to appear before Council and may determine at which meeting.
- Please submit this completed form at your earliest convenience. Written Requests to Appear are to be received by the Corporate Officer, no later than noon Monday, one week prior to the Council meeting. Please include a copy of all materials that will be discussed.
- If you'd like to share a PowerPoint with Council, email it to the Corporate Officer by 9:30 a.m. Wednesday prior to the Council meeting to be included with the Agenda.
- We recommend you bring backup PowerPoint files with you on a memory stick.
- Delegations are limited to 5 minutes.

## Request to Appear as a Delegation

Preferred Council Meeting Date: 22 January  
2019 \_\_\_\_\_

Second choice(s): 5 February  
2019 \_\_\_\_\_

Subject matter: Protection and management of the Penticton oxbows \_\_\_\_\_

Name of person(s) making presentation:

Rick McKelvey

Address:

Phone:

Email:

Please provide details of your presentation or request of Council here: (or provide a detailed attachment)

<p><b>Presentation on the current status of the Penticton oxbows, followed by a request to have them classified as Natural Areas, when the Parks Master Plan and associated by-laws are so amended.</b></p>
<p><b>Presentation will include a short slide show (Power Point) of 5 minutes, followed by an explanation of where we think the City can act to afford a more proactive type of management of those important wetlands.</b></p>
<p><b>We also believe if the City acts to strengthen protection of the oxbows, this is the right time to engage the Penticton Indian Band to help protect the wetlands from their side of the old river channel.</b></p>
<p><b>With commitments to protection and management from both the City and the Band, we believe there will be opportunity for non-government agencies, such as Ducks Unlimited Canada, to undertake habitat improvements to ensure long-term productivity and attractiveness of the wetlands.</b></p>

**Please note:**

- This form and submissions will become part of the public record.
- The Mayor has the authority to determine if the subject matter warrants the delegation to appear before Council and may determine at which meeting.

**Protection and management of Penticton oxbows  
Delegation and Proposal by the Friends of the Oxbows  
22 January 2019**

Wetlands were never particularly abundant in the dry Okanagan Valley, but those that were here have been heavily impacted by the growth of the human population over the past 150 years. The city of Penticton has grown up on a large alluvial fan formed by Penticton, Ellis, and Shingle creeks since the last Ice Age. As that fan built up it led to the creation of the two separate lakes we see today, namely Okanagan and Skaha. A low gradient river, the Okanagan, continued to connect those two lakes, and formed extensive wetlands along its path. Periodically, however, the Okanagan River and its tributaries overflowed their normal courses, and as settlement proceeded in our city, caused considerable damage through spring floods. In the early 1950s that problem was solved once and for all by the channelization of the Okanagan River, and by flood-proofing Penticton and Ellis creeks. The channelizing of the Okanagan River created new wetlands, or oxbows, where the old river channel once meandered back and forth over its old flood plain.

Wetlands are amongst the most productive habitats in nature, and particularly so in our arid environment. The Penticton oxbows provide habitat for a large range of species throughout the year, including habitats for endangered species. The oxbows are also used as receiving environments for management of storm water drainage from our city. All is not well with the oxbows, however, because they are silting in and eroding. They are no longer being re-energized each year during freshet, so silts are not being moved downstream, and no new silts are being added to their banks during flooding, resulting in bank instability. The Friends of the Oxbows believe there is much to be gained by re-vitalizing our oxbow wetlands. With periodic cleanups they can continue to provide detention for storm water, habitat for wildlife right in the city, they can become a salient feature for our tourist economy, and they can be used for passive outdoor recreation, which is a generally good thing for the health of our citizens.

The Friends of the Oxbows believe that non-government conservation agencies can be enlisted to help rejuvenate our oxbows. We also believe that if the City acts to enhance protection of the oxbows from the perspective of its jurisdiction, the Penticton Indian Band may do the same on lands under its control. With some form of enhanced legal protection for the oxbows, non-government agencies likely will invest in oxbow management.

Our proposal is to: 1) delineate the lands within the City's control as Natural Areas Parkland; 2) work with the Penticton Indian Band to develop legal protection for the oxbow lands in its jurisdiction; and 3) approach non-government conservation agencies to assist with development and implementation of conservation plans for the rejuvenation of the Penticton oxbows.

As always, the Friends of the Oxbows are prepared to help in whatever capacity we can to help protect and manage these important remnant habitats within our city.

# PSOSRD YEAR END STATISTICAL REPORT

January to December 2018 Open

## Message from the Officer in Charge

Thank you for taking the time to read this report. This special report is specific to the City of Penticton and will be incorporated into the final year-end report for the Penticton South Okanagan Similkameen Regional Detachment in January. The final report will include comparisons between communities in our area for a more fulsome description of crime patterns in the region.

In January 2019, statistical reporting using the Uniform Crime Reporting methodology will change. In essence, 2019 will be year one for the new system and will provide a new baseline for crime reporting to our communities. As a result, it will no longer be effective to compare 2019 data to years past, therefore, this final report will be the last one comparing historical crime trends for the foreseeable future.

The Community Active Support Table (CAST) is up and running and has already dealt with over 25 situations where members of our communities were at an acutely elevated risk. They have either been connected to services or their risk has been mitigated. This is an important first step for CAST which will be moved to the regional area covering the whole South Okanagan and Similkameen in the spring. Although CAST is not the only solution to the social concerns in our community, its strength lies in its multi sectoral approach bringing all partners together around the same table once a week in order to support persons in a vulnerable state. I invite all members of our local governments to come and see the table in operation, as well as community leaders who want to make a difference in the social concerns throughout our region.

Once again, it is important for me to state my support for the housing initiatives that are moving forward, since they will have a large impact on the perception of homelessness and vulnerable populations in Penticton and the surrounding area. An additional police officer will be added to our Community Support and Enforcement Team in January, who will primarily focus on youth and downtown community issues including support to the housing units in the area.

Finally, as we begin to develop policing priorities in concert with our local mayors and councils as well as the communities we serve, we look forward with starting our "Crowd Forums" in advance of our overall Community Policing Forum in March. Please feel free to contact us any time at [Penticton.general.enquiries@rcmp-grc.gc.ca](mailto:Penticton.general.enquiries@rcmp-grc.gc.ca) to schedule your own forum or just to ask a question. As always, if you require immediate police assistance, never hesitate to call **911** or our non-emergency number in your community.

Community Policing experienced an increase in **Crime Prevention Through Environmental Design (CPTED)** requests in Penticton in 2019. Reviews were done in the downtown areas including Nanaimo Square and businesses to make them less susceptible to break ins and the congregations of problem persons. Reviews were also done at several schools, churches and City facilities such as the library and community centre, as well as numerous private and shared residential units/ neighbourhoods to provide suggestions on how to reduce crime and problems.

## Major Investigations

In 2018, there were no homicides in the City of Penticton, however, investigations continued on two homicides from 2017, the death of Randall TOEWS (2017-5662) and 17 year old Devon BLACKMORE (2017-4406). Both files have charge approval and have been fully disclosed to Crown Counsel. GIS also assisted SED MCU with two homicides in the rural community of Oliver and IHIT for a high profile murder of a Belgium tourist.

PSOSRD GIS has investigated a variety of serious offences in the Penticton area, many of which have resulted in charge approval submissions including a shooting on Government St (2018-7517), five child pornography investigations, a car-jacking of an elderly woman (2018-6548), three Workplace fatalities and various suspicious deaths requiring oversight.

PSORSR GIS has provided operational support to a number of investigations in the regional areas including an attempted murder in Oliver (2018-2759), suspicious death files in Oliver (2018-2715, 7640), foster child sex assault in Princeton (2018-2980) and a home invasion in Princeton (2018-665).

In the majority of the more complex investigations, various judicial authorizations are executed, numerous statements obtained and scenes processed. While GIS is not primarily the lead investigator for investigations, support is given with DMFT/DCFT downloads, judicial authorization reviews, child step-wise interviews, warned statement preparation and file reviews.

Continuous interaction is required with our community partners during various investigations, including the BC Coroner's Service, BC Worksafe, School District 67, SOWINS, MCFD, Probation and Crown Counsel.
