Campbell Mountain recreational users to receive temporary parking lot

Penticton – Campbell Mountain is well used for recreational purposes including, hiking, biking, horseback riding, dog walking etc. Due to the popularity of the area, parking has become a concern as there is currently very limited road side parking available. Current parking arrangements have resulted in emergency access to the mountain being blocked, Reservoir Road is starting to get congested with parked cars, and vehicles are being parked on private property which is creating access issues for local residents.

To help alleviate the problem, the City's Public Works Department will be installing a basic gravel parking lot near the junction of Greyback Mountain Rd, Reservoir Rd and Spiller Rd. Construction is expected to commence the week of May 1 and should be ready for use within a week. Please look for signage to guide you to the parking area.

At such time as a management plan for the area is developed, the temporary parking lot may be removed, relocated or expanded to meet the needs determined by the management plan.
